(STARTUP) CO-FOUNDER
uCraft

- uCraft is a **marketing automation** SaaS platform in Georgia.
- Key products include marketing automation platform (uCraft), AI-based translation service (translate uCraft) , and document translation tool (uCraft Docs).

<https://translate.ucraft.io> - 25000 MAU (monthly active users). Operates on it's own without any additional operational effort from my side.

<https://ucraft.io> - marketing/business processes automation platform - **failed** due to a high level of competition on the global market and other AI/LLM alternatives.

My responsibilities as a Co-Founder included developing company strategy and product development, managing marketing activities and team. Successfully launched and scaled an AI translation service to 25,000 monthly active users. After strategic market analysis, we pivoted company resources away from the hyper-competitive automation platform to focus on high-growth translation tools.
